

Safeguards trade peak correction for lower per-track regression risk

- Fixed precision

■ CASM

— MSCNN-lite / SMC OOF

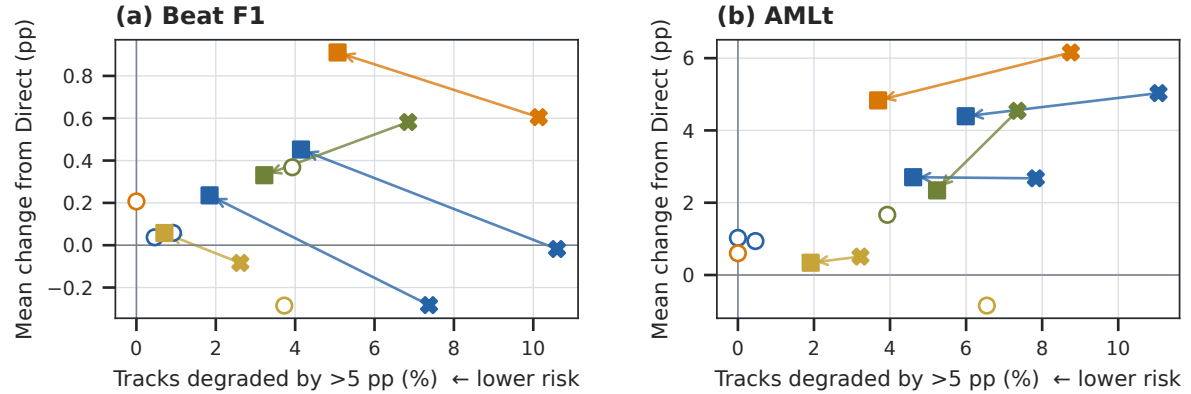

— Beat This / GTZAN seed0

✱ No safeguards

— Beat This / SMC OOF

— TCN / SMC final0

— MSCNN-lite / GTZAN

Each point uses the same paired activation panel; arrows show No safeguards → CASM. Risk is the fraction of tracks whose score falls by more than five percentage points relative to Direct. TCN final0 is exploratory rather than OOF.
